

2,234 Expressions of Democracy

A Database

What follows is a catalogue of real existing adjectives that have been used to describe the noun democracy in the extant literature provided by the Google Scholar and Google Books corpora. Each individual expression points to a distinctive archive which might be one publication or several hundred thousand publications large. It is in these archives where the meaning – or meanings – of an expression can be found.

I believe that it is in studying the many and diverse expressions of democracy that we can come to better understand, and therefore more fully appreciate, democracy's long and complex life. I feel that getting to know democracy's life better, and sharing this knowledge in an inclusive and public way, will lead us to regularly reaffirm our commitment to democracy. Maybe even lead us to democratize (deepen, enliven, improve) our democracies instead of thinking about jettisoning them for perhaps more autocratic or illiberal regime types.

There is a degree of synonymy in the database. Although some expressions – like fast, high-speed, and quick democracy – lead to different publications they are in large part establishing the same points. These expressions can therefore be grouped into a family of meaning which helps simplify the database. There will also be instances where, after analysis, an expression will be found to point to nothing in particular (e.g. the expression turned out to be a throw-away line). It can then be removed from the database. Some expressions will refer to an assortment of false positives – like illiberal, despotic, and authoritarian democracy – which should probably be separated from the rest and added to a different database on “non-democracy”. It is also worth noting that what *is not* listed in the database is as important as what *is* listed: think, for instance, about terms like Sydneysider, New Yorker, and Torontonion democracy that have no literature associated with them, but should, if only to understand how the people who live in those cities understand their local democracy.

You are very much invited to explore the database. Hopefully you'll uncover a forgotten instance of democracy, some blast from the past, that will have resonance with one of our contemporary democracy troubles and help us find new ways of responding to them.

Acknowledgements

I am indebted to many friends and colleagues for their suggested expressions of democracy as this catalogue developed over the last 3 years. Most suggestions turned out to be real existing things! Very special thanks goes to my comrades in the Centre for Deliberative Democracy and Global Governance and the Institute for Governance and Policy Analysis at the University of Canberra, in the Sydney Democracy Network at the University of Sydney, and in the National School of Arts at the Australian Catholic University.
